ANASTASIJA ZLATIC | INDUSTRIAL ENGINEERING STUDENT

anastasija.zlatic@fau.de | +49 176 46505182 | LinkedIn: /in/anastasija-zlatic

Through my studies in Electrical Engineering and my hackathon experience, I have built a solid technical foundation that enables me to understand complex digital products and translate them into tangible features. Across the numerous hackathons I have participated in, I have learned to collaborate effectively across design, tech, and business teams and to quickly turn ideas into functional prototypes. My motivation is to understand the real problems users face and develop solutions that truly improve their lives.

TECHNICAL SKILLS

- **Webdesign:** Figma, WordPress, SharePoint, Canva
- **Marketing:** SEO, LinkedIn Content, MailerLite
- **Office:** PowerPoint, Word, Excel, Visio
- **Frontend:** HTML/CSS, JavaScript, React

WORK EXPERIENCE

HOREICH (Hardware Startup for Enviorment - and Infrastructurmonitoring)

Working Student Productmanagement | *May 2025 – Nov. 2025*

- Redesign and optimization of the company website in WordPress (structure, SEO, modern design)
- Creation of user manuals and technical documentation for sensor products
- Support in developing sales strategies and go-to-market approaches (LinkedIn-Marketing and Newletters)

Siemens Healthineers (IT Customer Services and Enterprise Service EMEA)

Working Student Project Management | *Feb. 2020 – May 2023*

- Development and implementation of SharePoint websites to optimize processes
- Creation of visual tools (Gantt charts, PowerPoint, Visio) for project management
- Writing user manuals for web services to support onboarding of new employees

ENTREPRENEURSHIP & PROJECTS

Healthcare Hackathon Bayern | Challenge Bionorica | 2024 – Present

Co-Founder, Menopause-App „MARIE“

- Conducted user interviews and needs analysis
- Designed UI/UX in Figma for a digital health app
- Created pitch presentations and further developed the app after the hackathon
- Identified and established strategic partnerships

Zollhof Tech Incubator Talent Programm | Okt. 2024 – Dez 2014

- Developed a Figma prototype for an app that guides users through end-of-life planning, helping them organize all aspects of their legacy, funeral arrangements, and inheritance — including a business plan, currently being implemented by the partner company (Nuermberg Insurance)

Startup: SportBuddy (CMO) | 2023 – 2024

Interactive app for sports enthusiasts to connect and network

- Set up and managed social media presence (Instagram, LinkedIn)
- User acquisition and community building
- Organized a university sports course to increase brand awareness

FAU Digital Tech Academy Fellow + Existency Building Box | 2023

- Learned fundamental entrepreneurial skills, including business plan development, prototyping, and design thinking
- Applied these skills in a diverse team to develop and validate a start-up idea through market research, prototyping, and user feedback

EDUCATION

M.Sc. Industrial Engineering (specialization in power systems) *April 2026 – present*
Friedrich-Alexander-Universität Erlangen-Nürnberg

B.Sc. Electrical Engineering (General) *March 2020 – 2026*
Friedrich-Alexander-Universität Erlangen-Nürnberg

ADDITIONAL INFORMATIONEN

- **Languages:** Englisch, Deutsch, Serbo/Kroatisch
- **Hackathons:** HackBay 2025, Junction Helsinki 2024, Healthcare Hackathon Bayern 2024, HackBay 2024, HackBay 2023 (Finalistin)
- Other: Volunteer at Slush 2025 (Limited Partners team)
